EDUCATION

Georgia State University (Honors College)

Graduation : May 2028

Bachelor of Science + Master of Science (Dual Degree) in Computer Science | GPA: 4.00

Relevant Coursework: Deep Learning, Machine Learning, Data Mining, Cloud Computing, Advanced Algorithms, Computer Architecture, Software Development, Data Structures, Operating Systems, Applied Probability & Statistics

EXPERIENCE

Intuit, Inc.

Site Reliability Engineering Intern

May 2026 - Aug 2026

- Reduced incident rollback times by 50% by optimizing the deployment pipeline for stable software updates, safely testing and deploying this pipeline update after-hours.
- Led a system resilience program, executing chaos engineering tests and failure analysis (FMEA) to proactively identify and fix vulnerabilities to reduce potential incidents in production releases.
- Migrated multi-repository deployment data to a scalable relational datastore with zero downtime reducing API failures.

Software Engineering Intern

May 2025 - Aug 2025

- Migrated 33% of Intuit Mailchimp monolith's CI pipeline from bare metal colocation nodes to AWS based Jenkins pipeline, improving CI maintainability and build reliability for 600+ engineers.
- Managed complex container orchestration involving legacy and updated container images; evaluated trade-offs between native Kubernetes and Podman container-in-container approaches reducing CI times by 30%

TReNDS Center

Machine Learning Research Assistant

Jan 2026 - Present

- Redesigned a PyTorch-based neuroimaging framework using Independent Vector Analysis (IVA) to resolve resource bottlenecks, optimizing computational efficiency and significantly increasing throughput for large-scale subject datasets
- Integrated transformer-based multi-head attention layers into the upgraded architecture to further accelerate processing speeds and maximize model efficiency for complex brain image analysis
- Engineered distributed training pipelines in Python across multi-GPU High-Performance Computing (HPC) clusters, streamlining deployment workflows and ensuring stable training for deep learning models.

Machine Learning Research Intern

Jun 2024 - Aug 2024

- Optimized a PyTorch signal-separation model for fMRI brain data across 26+ experimental runs, using Definitive Screening Design (DSD) and regression to isolate key hyperparameters and cut model error by 20%.
- Engineered data and evaluation pipelines using Python (NumPy, Pandas) and MATLAB for neuroimaging preprocessing, hypothesis testing, and loss/metric visualization.

PROJECTS

HeyAI - Voice for AI Platforms | *Golang, Next.js, Google Cloud* – [GitHub](#) | [Devpost](#)

November 2025

- Engineered a scalable, low-latency voice AI platform for real-time phone conversations with LLM agents, integrating Twilio, Vertex AI, and ElevenLabs via a cloud-native Go backend on Google Cloud Run.
- Built a Next.js/TypeScript admin console with BigQuery analytics and robust CI/CD pipelines (Docker, Cloud Build), winning 1st Place at AI ATL 2025 for delivering an industry-grade application.

Savr - AI-Powered Meal Planning Platform | *AWS Bedrock, DynamoDB* – [GitHub](#)

October 2025

- Engineered a dynamic meal-generation AI that creates personalized recipes from scanned grocery receipts, utilizing AWS Bedrock (Claude 3.5 Sonnet) for reasoning and Amazon Textract for data extraction.
- Architected a serverless backend infrastructure using AWS Lambda, API Gateway, DynamoDB, and S3 (automated via AWS CDK), optimizing the data pipeline to achieve sub-10 second end-to-end latency for OCR and AI workflows.

INVOLVEMENTS

Residence Hall Association | *President*

Aug 2025 – Present

- Advocated for 3,000+ on-campus residents and directed programming to strengthen residential communities.

Programming Club (Progsu) | *Vice President*

Aug 2024 – Present

- Scaled the largest campus tech organizations to over 1,500 members, organizing technical workshops and hackathons

TECHNICAL SKILLS

Languages: Python, C++, Go, Groovy, JavaScript, TypeScript, SQL, MATLAB, HTML/CSS

Cloud/DevOps: Docker, Kubernetes, ArgoCD, Podman, Jenkins, CI/CD, Git, GCP, AWS, Azure, Vercel, SLURM/HPC

Frameworks/Libraries: React, Next.js, Express, FastAPI, PyTorch, TensorFlow, JAX, NumPy, Pandas, Matplotlib

Databases/Tools: PostgreSQL, MySQL, Firebase, BigQuery, Cloud Run, Cloud Build, Vertex AI, Codex, Claude Code
